saivaibhav262

Education

- 2021–2025 **B.Tech in Computer Science Engineering**, *Institute of Aeronautical Engineering*, Hyderabad, CGPA: 7.81
2019–2021 **Intermediate (Class XII)**, *Sri Chaitanya Junior College*, Hyderabad, 88.8%

Technical Skills

- Languages Python, Java, SQL, HTML5, CSS3, JavaScript (ES6)
Core CS Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), SDLC,DBMS
Cloud & Security AWS Core Services, Azure Fundamentals, Zero Trust Security Architecture
AI & ML TensorFlow, Generative AI, Image Processing, Natural Language Generation (NLG)
Developer Tools Git, Docker, REST APIs, MySQL, MongoDB, Jupyter Notebook, VS Code

Professional Experience

- Jul 2024–Sep 2024 **Generative AI Intern**, *AICTE*, Remote
 - Learned and applied Generative AI techniques to create and automate content generation workflows, improving overall processing efficiency by 25%.
 - Explored Natural Language Generation (NLG) techniques to generate coherent and accurate text content, improving content quality by 20%.
 - Practiced AI-based image generation and refinement techniques to create personalized visual content with improved image quality.
 - Performed testing and evaluation of AI-generated content to identify quality issues and improve output accuracy by 15%.

Aug 2023–Sep 2023 **AWS Cloud Computing Intern**, *NSIC*, Remote
 - Gained hands-On exposure to AWS core services, cloud deployment, and migration concepts through exercises.
 - Practiced AWS and cloud security fundamentals, including user access, permissions, and resources-level controls.
 - Explored cloud resource management and scaling concepts to understand how AWS environments handle changing workloads.
 - Studied AWS cost optimization and resource allocation practices to understand efficient cloud infrastructure management.

Projects

- 2026 **Interactive Personal Portfolio Website**, *Web Developer*
 - Designed and launched a custom, responsive portfolio using HTML, CSS, driving a 35% engagement boost.
 - Leveraged WCAG compliance methodologies to ensure full accessibility, widening platform audience reach by 20%.

2024 **Image Super-Resolution (AI/ML)**, *TensorFlow Developer*
 - Deployed the state-of-the-art SR3 diffusion framework using TensorFlow to reconstruct high resolution images.
 - Achieved a 95% target accuracy rating across benchmarking datasets during rigorous internal validation loops.
 - Optimized baseline model hyper-parameters and matrix executions, reducing processing latencies by 20%.

2023 **Personal Expense Tracker**, *Full-stack web application*
 - Developed a browser-based personal expense tracker using JavaScript, HTML, CSS, and Supabase, supporting expense CRUD operations, category-based analytics, monthly reports, and CSV/PDF exports.
 - Implemented Supabase authentication, user-scoped cloud storage, and LocalStorage-based offline persistence, enabling users to securely manage expenses and continue using the application without an internet connection.
 - Built automatic cloud synchronization, input validation, JSON backup/restore, soft deletion, and timestamp-based conflict handling to improve data reliability and consistency across local and cloud storage.

Certifications

- Python Developer Issued by Code Clause | Specialized in automation tools & algorithmic execution paths.
AWS Developer Issued by NSIC | Hands-on expertise in serverless architectures, cloud deployment, and IAM setup.
Zero Trust Cloud Security Issued by AICTE | Proficient in Zero-Trust networking parameters and security frameworks.
