

BUNEDU SAI VAIBHAV

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE ENGINEERING

+91 7386427099 | vaibhavsai762@gmail.com | Hyderabad, India | [LinkedIn](#) [GitHub](#)

EDUCATION

B. Tech in CSE Institute of Aeronautical Engineering (CGPA 7.81)	2025
Intermediate Sri Chaitanya Junior College (88.8%)	2021

CERTIFICATIONS

- Python Developer – Code Clause:** Built Python-based automation tools & optimized algorithm performance.
- AWS Developer – NSIC:** Firsthand cloud deployment, migration, and architecture optimization.
- Zero Trust Cloud Security – AICTE:** Gained expertise in cloud security principles & identity access management.

TECHNICAL SKILLS

- Programming Languages:** Python, Java, SQL
- Core skills:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), DBMS
- Web Development:** HTML, CSS, JavaScript, REST APIs, MySQL, MongoDB
- Cloud Technologies:** AWS and Azure fundamentals
- AI & Machine Learning:** TensorFlow, Generative AI, Image Processing
- Tools & Frameworks:** Git, Docker, Jupyter Notebook, Visual Studio Code

WORK EXPERIENCE

Generative AI Virtual Internship – AICTE	Jul 2024 - Sept 2024
---	----------------------

- Developed **AI-powered content automation models**, increasing processing efficiency by **25%**.
- Enhanced **natural language generation** models, improving content accuracy by **20%**.
- Incorporated machine learning algorithms** for personalized AI-generated content, improving text coherence by 25% and image generation quality by 30%.
- Spearheaded automated testing** and evaluation of AI models, increasing prediction accuracy by 15% and refining output precision.

AWS Cloud Computing Internship – NSIC	Aug 2023 - Sept 2023
--	----------------------

- Conducted AWS optimization workshops**, improving cloud resource allocation by 15%, reducing operational costs.
- Authored an AWS cloud migration whitepaper**, streamlining deployment practices and cutting transition time by 35%.
- Implemented automated cloud scaling models**, enhancing infrastructure reliability, and reducing downtime by 20% for high-traffic environments.
- Audited AWS security compliance**, ensuring protection of critical data assets and strengthening access control policies by 30%.

PROJECTS

Mail Application – Python Developer (Code Clause)

- Engineered** a Python-based email management system featuring an adaptive priority inbox, boosting email sorting efficiency by **45%**.
- Deployed** an intelligent spam filtering algorithm, decreasing inbox clutter and improving user productivity metrics.
- Configured custom API connectors, streamlining communication across multiple platforms.

Personal Portfolio Website – Web Development

- **Designed** an interactive web portfolio using HTML, CSS, and JavaScript, elevating UI/UX engagement metrics by 35%.
- **Optimized** cross-browser responsiveness and accessibility (WCAG compliance), expanding unique user reach by **20%**.

Image Super-Resolution – AI/ML

- **Deployed** the SR3 (Super-Resolution via Repeated Refinement) model using TensorFlow for high-fidelity image enhancement, achieving **95%** accuracy during performance testing.
- Conducted performance benchmarking, reducing image processing time by 20%.
